

Assignments

On submission:

You are encouraged to discuss assignment content with your peers. You can also visit your lecturer in his office hours to discuss the assignment-related queries, but make sure that you don't ask or expect direct solutions to the questions.

Office hours: Every Tuesday 10:30 – 12:30

Assignment solutions should be written up clearly and succinctly; you may lose points if your answers are unclear or unnecessarily complicated. You are encouraged to use LaTeX to write up your homeworks, but this is not a requirement. We will accept scanned handwritten assignments but they will not receive the bonus point.

On getting late:

All assignments that are not submitted in Moodle by the deadline will be penalized as follows:

- First day late 10% of the total marks deducted
- Second day late 20% of the total marks deducted
- Third day late 30% of the total marks deducted
- Fourth day late 40% of the total marks deducted
- Fifth day late 50% of the total marks deducted
- After fifth day late No marks awarded

In the case of extreme hardship situations, you must notify the course examiner via email, including supporting evidence, as soon as possible. If a point deduction waiver is granted, the instructor will establish new deadlines and a plan for the student to get back on track.
