Assignment 2
Due Date: Monday, February 14

Problem

Using Praat software to analyze with your own voice, in terms of:
- The distribution of durations for voiced segments
- The distribution of durations for unvoiced segments
- The distribution of frequencies for the first formant
- The distribution of frequencies for the second formant

Submission

Your submission includes:
- audio file
- text grid file
- snapshot of Praat including audio signal, spectrogram and your annotations.
- Excel sheet that provides the distributions.
